

PRIYANKA J

St.Louis, MO | +1 (314) 224-4793 | priyankajamma2@gmail.com | Portfolio

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience delivering business intelligence, reporting, and data analytics solutions. Skilled in SQL, Python (Pandas, Scikit-learn), and Power BI, with hands-on experience building ETL workflows, transforming large datasets, and developing KPI-driven dashboards that improved reporting efficiency by 40% and reduced data discrepancies by 35%. Strong in data modeling, data quality, and stakeholder reporting, with expertise in translating business requirements into structured datasets and business insights for data-driven decision making. Experienced in predictive analytics and applied machine learning for forecasting, risk identification, and performance analysis, with a proven ability to support cross-functional teams and drive data-informed decisions.

TECHNICAL SKILLS

Programming & Data Analysis: Python (Pandas, NumPy, Scikit-learn), SQL (Advanced Queries, Joins, Window Functions), R

Data Visualization & Business Intelligence (BI): Power BI (DAX, Power Query, Data Modeling), Tableau, Advanced Excel (Pivot Tables, Power Pivot, Lookup Functions), KPI Reporting, Dashboard Development, Stakeholder Reporting, Data Analytics, Business Insights, Insights Generation, Data-Driven Decision Making

Data Engineering & Processing: ETL/ELT Pipelines, Data Transformation, Data Integration, Data Pipeline Orchestration, Reporting Automation, Informatica PowerCenter, Oracle Data Integrator (ODI), PL/SQL

Databases & Data Modeling: PostgreSQL, MySQL, Oracle, MongoDB, Dimensional Modeling (Star & Snowflake Schema), Data Warehousing

AI & Advanced Analytics: Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Analytics, Applied Machine Learning (Regression, Classification), Feature Engineering, Model Evaluation, Predictive Analytics & ML-Driven Insights, Anomaly Detection

Cloud & Modern Data Platforms: Oracle Cloud Infrastructure (OCI), Oracle Analytics Cloud (OAC), OBIEE

Tools & Workflow: Git, Jira, Postman

Core Data & Analytics Concepts: Data Cleaning, Data Validation, Data Quality Management, Business Intelligence, Data Governance, Process Automation, KPI Tracking, Stakeholder Reporting

PROFESSIONAL EXPERIENCE

Data Analyst

Jul 2025 - Present

Community Dreams

- Designed centralized PostgreSQL data models to unify donor and program data, which improved reporting consistency and enabled leadership to track KPIs with 35% fewer discrepancies.
- Built automated data workflows using Python (Pandas, NumPy) to standardize and clean large datasets, reducing manual effort by 40% and accelerating analytics delivery cycles.
- Developed business-facing dashboards in Power BI using DAX and Power Query, allowing stakeholders to monitor program impact and accelerating decision-making speed by 25%.
- Partnered with operations and program teams to define KPIs and reporting metrics, translating business needs into structured datasets that improved performance tracking.
- Improved reporting efficiency by optimizing SQL queries with joins and window functions, reducing execution time by 30% and enhancing dashboard responsiveness.
- Established data quality frameworks using SQL validation and Python checks, then presented business insights through dashboards to stakeholders, reducing inconsistencies by 20% and enhancing decision confidence

Data Analyst Intern

Dec 2023 - Jan 2024

Excelerate

- Analyzed project execution data using Python (Pandas) to identify delays and inefficiencies, enabling teams to reduce schedule slippage by 18% across active projects.
- Applied Scikit-learn models to forecast project risks based on historical data, which helped teams take proactive actions and reduce delays by 15%.
- Created project performance dashboards in Tableau, improving visibility into timelines and resource utilization and increasing decision speed by 20%.
- Transformed raw project datasets using Excel Power Pivot, improving data structure and reducing manual preparation effort by 25%.
- Worked with operations teams to align reporting outputs with business requirements, ensuring accurate tracking of project KPIs and delivery metrics.
- Conducted exploratory data analysis using Python, uncovering patterns that supported process improvements and better execution planning.

Data Associate

Aug 2023 - Oct 2023

Excelerate

- Validated and cleansed large datasets using SQL and Excel, improving data accuracy by 30% and reducing reporting errors across business operations.
- Structured raw datasets into analysis-ready formats using Excel data modeling, reducing preparation time by 25% and accelerating reporting workflows.
- Combined multiple data sources using SQL joins and Excel transformations, improving data accessibility and reducing data retrieval effort by 20%.
- Performed exploratory data analysis using Python (Pandas) to identify anomalies and trends, supporting data-driven decisions and actionable business insights.
- Automated repetitive data preparation tasks using Python scripting, reducing manual workload by 35% and improving overall operational efficiency.
- Prepared clean, structured datasets for Power BI dashboards, ensuring accurate KPI tracking and improving report performance and usability.

Data Analyst

Jun 2023 - Jul 2023

Excelerate

- Developed KPI dashboards in Power BI using DAX and Power Query, enabling real-time monitoring of business metrics and reducing decision turnaround time by 25%.

- Automated reporting workflows using SQL and Python-based data pipelines, reducing report generation time by 40% and ensuring consistent analytics delivery.
- Applied machine learning models using Scikit-learn to analyze historical trends, identifying patterns and reducing operational inefficiencies by 15%.
- Designed optimized data models in Power BI, improving query performance and reducing dashboard load time by 30% for large-scale datasets.
- Collaborated with stakeholders to translate business problems into analytical solutions, enhancing reporting accuracy and enabling data-driven decision making.
- Conducted exploratory data analysis using Python, uncovering insights that optimized operational processes and improved performance tracking efficiency.

Data Analyst

Oct 2021 - Jun 2023

Apps Associate

- Built and maintained enterprise data pipelines using Informatica PowerCenter and ODI, improving data integration efficiency by 30% and supporting large-scale reporting systems.
- Optimized SQL and PLSQL queries to improve data retrieval performance, reducing execution time by 25% and enhancing BI dashboard responsiveness.
- Managed data ingestion across on-prem and cloud systems using Oracle technologies, ensuring consistent data availability for analytics teams.
- Implemented validation checks within ETL workflows, reducing data inconsistencies by 20% and improving accuracy of reporting datasets.
- Partnered with business teams to translate reporting requirements into structured datasets, enhancing KPI tracking and generating actionable business insights for decision-making.
- Delivered analytics-ready datasets to Power BI, OAC, and OBIEE, reducing dashboard development time and enabling faster access to insights.

Data Analyst Intern

Dec 2020 - Oct 2021

Softbuzz Technologies

- Assisted in developing ETL workflows using Informatica PowerCenter, improving data availability for reporting and reducing manual preparation effort by 20%.
- Optimized SQL query logic to enhance performance, reducing data retrieval time by 15% and supporting faster and more efficient reporting processes.
- Supported data ingestion using Oracle-based systems, ensuring consistent data flow and improving dataset reliability for analytics and reporting use cases.
- Performed data transformation using Informatica mappings and SQL, enabling structured datasets and reducing delays in report generation processes.
- Validated datasets using SQL checks, improving reporting accuracy by 18% and minimizing inconsistencies in business and analytical outputs.
- Collaborated with senior developers on data pipeline development, contributing to scalable integration workflows and improving overall data processing efficiency.

PROJECTS

Sales Performance Analytics with Predictive Insights

- Processed large retail datasets using SQL and Python (Pandas) to build structured analysis layers, improving reporting efficiency by 30% and enabling consistent KPI tracking.
- Built interactive dashboards in Power BI using DAX and data modeling to monitor revenue trends and product performance, improving visibility for business stakeholders.
- Applied regression models using Scikit-learn to forecast sales trends, providing predictive insights that improved planning accuracy by 18%.

Food Safety Compliance Analytics with Risk Identification

- Cleaned and transformed inspection datasets using SQL and Python, improving data consistency and enabling accurate tracking of compliance metrics across regions.
- Designed Power BI dashboards with KPI metrics to monitor violations and inspection scores, helping stakeholders identify high-risk areas and improve compliance efficiency by 20%.
- Used Python-based anomaly detection techniques to flag unusual inspection patterns, supporting proactive risk management and better prioritization of inspections.

Workforce Analytics Dashboard with Predictive Indicators

- Integrated multi-source employment datasets using SQL and Power BI data modeling, improving reporting accuracy by 25% and enabling a unified workforce view.
- Developed Power BI dashboards using DAX KPIs to track employment trends and performance indicators, supporting data-driven workforce planning decisions.
- Applied classification techniques using Scikit-learn to identify skill gap patterns, enabling teams to improve decision-making around hiring and training strategies.

EDUCATION

Master of Science in Information Systems

Saint Louis University | St. Louis, MO

May 2025

Bachelor of Technology in Information Technology

Jawaharlal Nehru Technological University | India

May 2021

CERTIFICATIONS

- Google Data Analytics Professional Certificate - **Coursera**
- Python for Data Science and Machine Learning - **Coursera**
- Data Analytics Professional Certificate - **LinkedIn Learning**
- Oracle Cloud Infrastructure 2022 Certified Foundations Associate
